Internet Zone

Revolving this area is as simple as a decal across the back wall.

Empty Space (Formerly Next Generation Check-in) rebrand to Innovation Space

This area is currently underutilised holding the A330 training rig until being moved into the '13'. This Zone has the potential to be a celebration of Qantas innovation, using a newly developed 'brand' that could also be rebranded and added to at any time. It is here we could call out all of the Qantas success and innovations, using the pillars for a variety of themes.

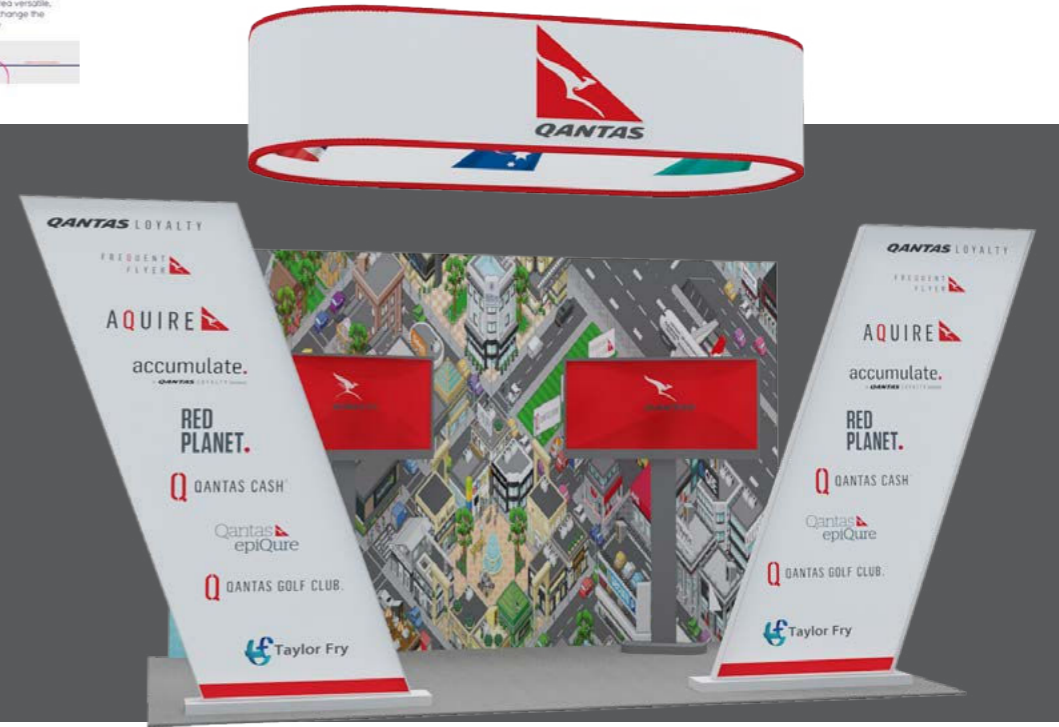

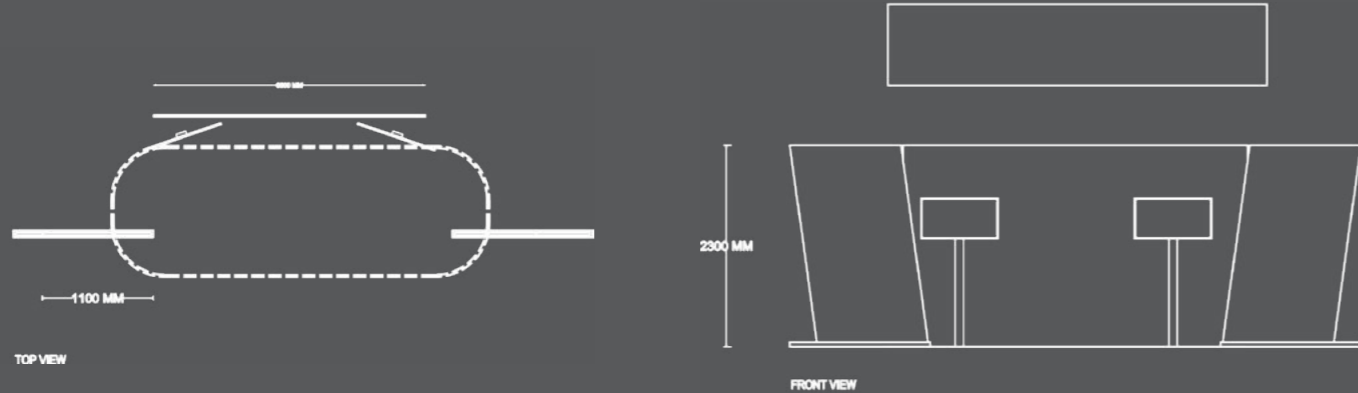

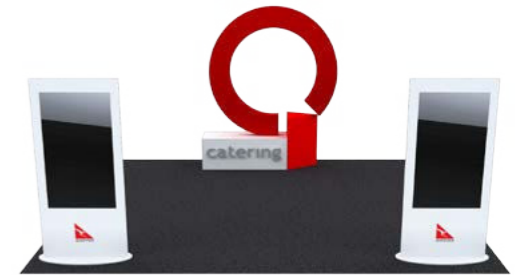

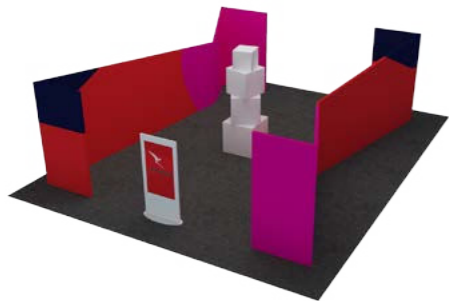

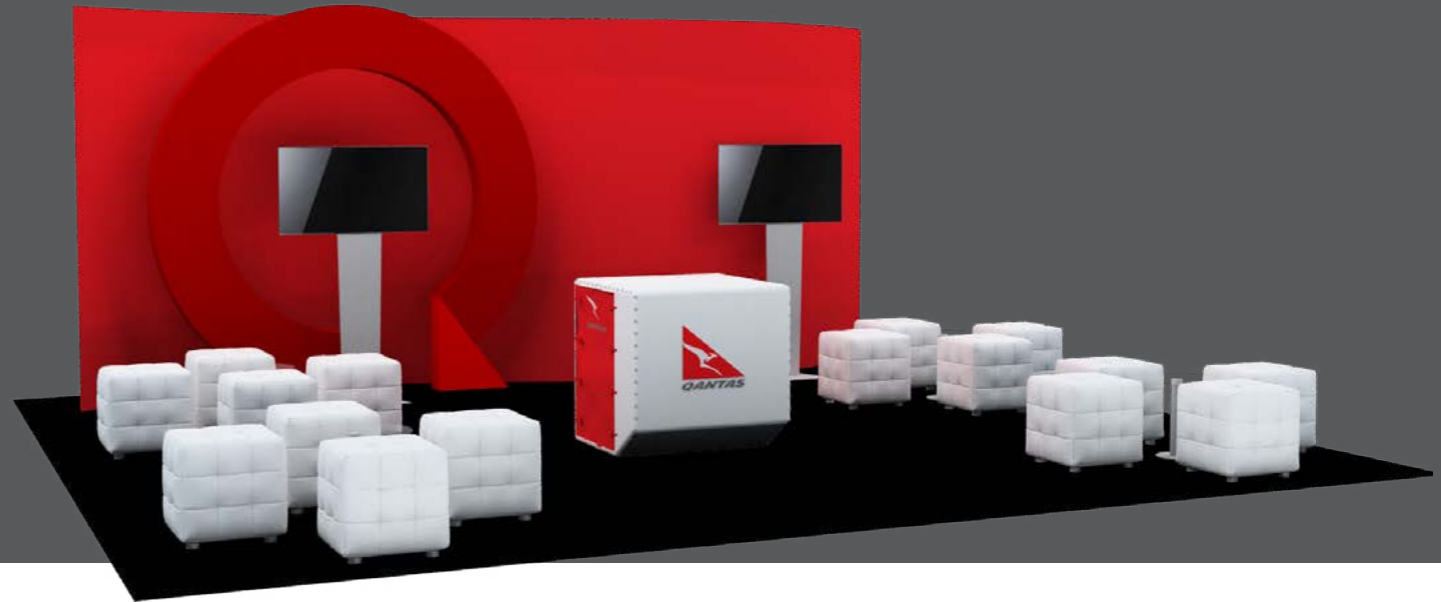

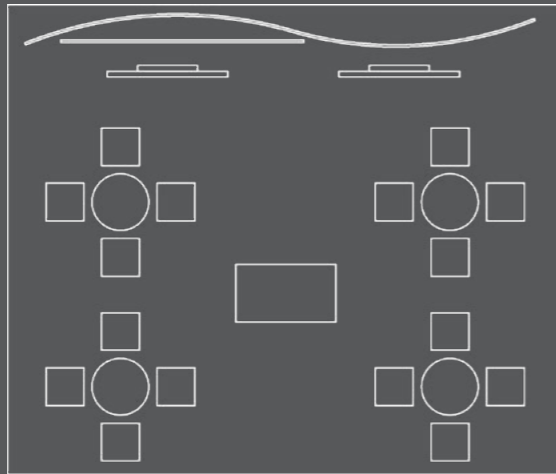

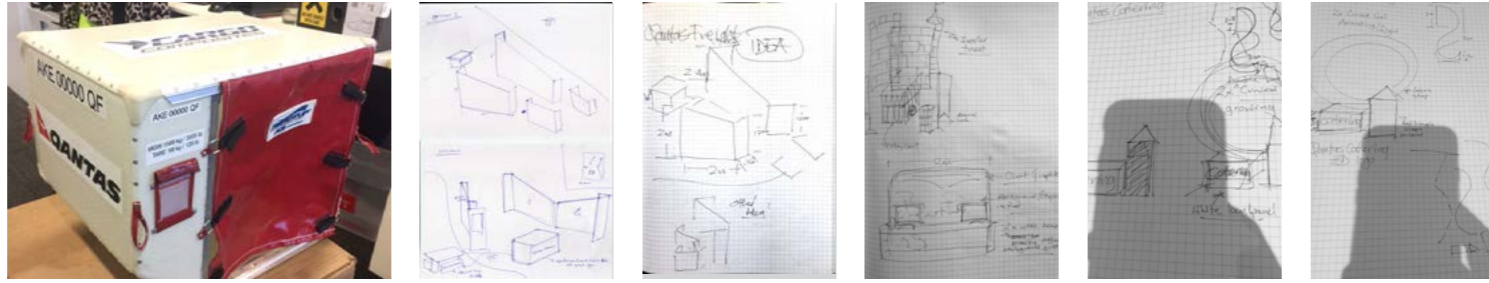

Entrance and Corridor

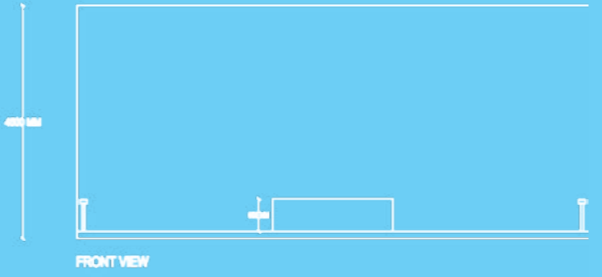

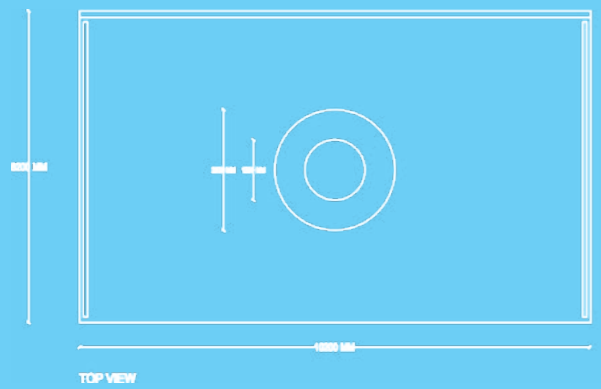

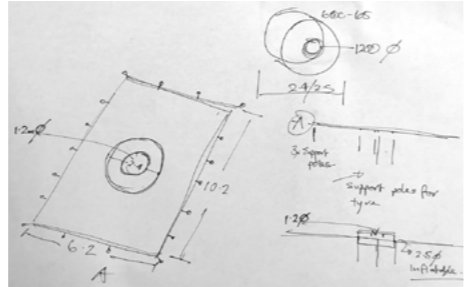

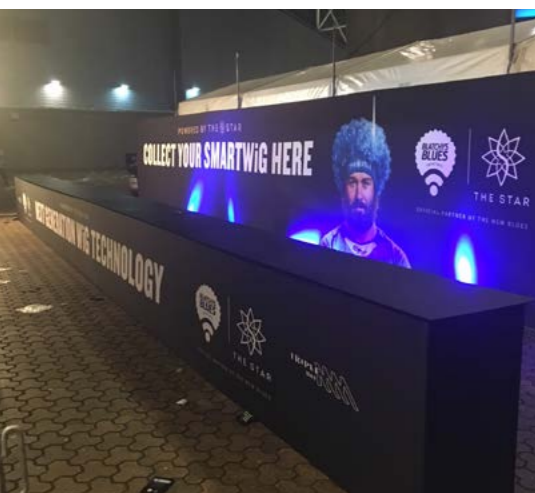

Use material and shape to form and soften the entrance, whilst also making the area versatile, with the ability to change the Banners out easily.
